

# Online store

Show your understanding of Angular.

## Part 1

1. Complete the project from the [tutorial](#)

## Part 2

2. Create a new Angular project
  - a. Implement the component “**Products**”, which shows the list of products. Each product must have the following properties:
    - i. image
    - ii. name
    - iii. description
    - iv. rating
  - b. Each product should be linked to a real item from [kaspi.kz](#)
  - c. Must be at least 10 products
  - d. Buttons “Share” for each product, by clicking, the user should be redirected to Whatsapp or Telegram with the link to the product
  - e. Optional: Add product image gallery, minimum 3 images.
